Dear Michael,

I want to personally thank both you and Robert for giving us three years of dedicated construction service. The project was not an easy one and I don't know of many companies that would have persisted the way you did in meeting all of the challenges and most of all the impossible schedules.

The success of this project would never have been realized if it wasn't for your company. I sincerely thank you for your efforts and am eagerly looking forward to working with you again.

Sincerely,
